Notice of Ethics Review: REB# 26-06-074 - Title: "Studying Pragmatic Interpretations of Natural Language Statements"

Read the instructions below before making and submitting any modifications.

eRAP USER GUIDES

All eRAP guides can be found on https://www.mcgill.ca/research/research/erap. Scroll down the page under you reach the User Guides section and expand the + icon next to the user group.

HOW TO SUBMIT MODIFICATIONS

Modifications to the form will need to be made using the McGill eRAP system. Login to eRAP (https://infoed.is.mcgill.ca) to make modifications.

The Principal Investigator can go into their Things to Do tab to find and edit the initial application. Any other users who have edit access to the application can access the application by clicking “Locate Records” and use the search function.

Revisions must be made in the section of the application as indicated in the REB Notice of Review comments. **Do not submit modifications via an Amendment form**.

HOW TO RESPOND TO REB COMMENTS

To facilitate and expedite the review process we ask that researchers respond to each Notice of Ethics Review comment and upload their response as a separate upload in addition to making changes directly on the form.

- **You can do this by copy-pasting the comments from the Ethics Review file into Word**, and in a new line (and/or in a different font colour), add your response for that specific REB comment indicating that it was done, and/or provide additional comments/context that you want to be considered in the post-modifications review to explain your revisions. This would reduce administrative turnaround time and the need for further follow-ups.
- Alternatively, you can use the Adobe comments feature to add comments directly to the PDF instead of using Word. Visit, https://helpx.adobe.com/ca/document-cloud/help/add-comments.html for instructions.
- **Upload this file** as a “Researcher Response to Ethics Review” in the **Additional Documentation (or Upload Study Documents) section** in the eRAP form.

When making changes to any attachments, we ask that researchers make changes using the track changes feature so that the REB Office can efficiently identify the changes that were made and reduce administrative turnaround time and further follow-up comments. Visit, https://support.microsoft.com/en-us/office/track-changes-in-word-197ba630-0f5f-4a8e-9a77-3712475e806a for instructions on how to use track changes.

To upload a new version of existing documents, click on the upload icon for that file, and **select in the pop-up window that asks, "Would you like to upload a new …", select, "version of an existing document"**.

Upload any new versions with a new version number and date in the filename itself, in the document's footer and in eRAP file name text field (i.e., v2_01-JAN-2024, v3_09-MAR-2025, etc.).

In accordance with the Tri-Council Policy Statement Ethical Conduct for Research Involving Humans, the REB-1 reviewed this project and the following modifications/clarifications are needed:

Consent Process

1. Q7- file name: Consent Form (per upload instructions, please put version date in the eRAP file name and inside the document itself.)

    a. Supervisor name, status, affiliation and institutional email address must be included.
    b. Student researcher student status must be indicated.
    c. Please insert REB protocol number.
    d. Please use REB contact information as it appears in the consent template. Consent Template

Confidentiality & Data Security

2. Q9/Q10 "Once completed, all research materials will be publicly shared." / All of the data we collect will be shared publicly on Github" This is not permitted. Sharing of data must be optional. And you actually have agreements on the consent form, so for those who say 'no', if any, that data is not shared. Prolific IDs cannot remain on the data when shared, of course. Privately stored on GitHub is fine.
3. Q9- Per the question, please clearly indicate how long data are kept, and how long the Prolific ID is kept. This is not limited to identifiable data.
