Reference-Game (Object) Stimuli — Full Catalog

30 unique color/shape contexts, each with a Weak and Strong utterance

Object stimuli (1-3 of 30)

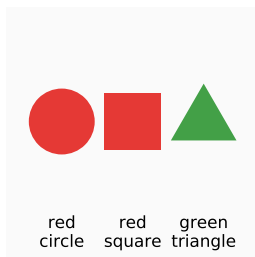

[ctx1] Mia & Noah

Scenario: Mia and Noah are sorting through a bin of old craft supplies. Three items sit in front of them:

Utterances: Weak = "Can you hand me the blue one?"
Strong = "Can you hand me the circle?"

Question: How likely is it that Mia wants the blue circle?

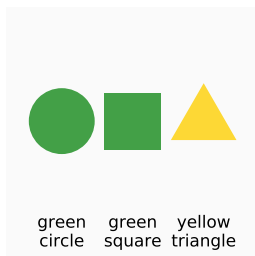

[ctx2] Priya & Sam

Scenario: Priya and Sam are unpacking a box of building blocks. Three blocks sit on the table:

Utterances: Weak = "Pass me the red one."
Strong = "Pass me the circle."

Question: How likely is it that Priya wants the red circle?

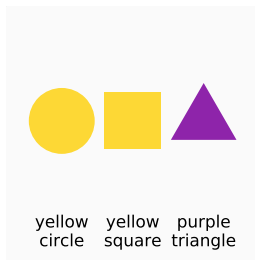

[ctx3] Farah & Tom

Scenario: Farah and Tom are setting up pieces for a board game. Three tokens sit on the table:

Utterances: Weak = "Could you grab the green one?"
Strong = "Could you grab the circle?"

Question: How likely is it that Farah wants the green circle?

Object stimuli (4–6 of 30)

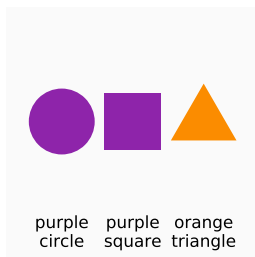

[ctx4] Oscar & Ivy

Scenario: Oscar and Ivy are arranging paint chips for a mural. Three chips sit on the table:

Utterances: Weak = "I'll take the yellow one."
Strong = "I'll take the circle."

Question: How likely is it that Oscar wants the yellow circle?

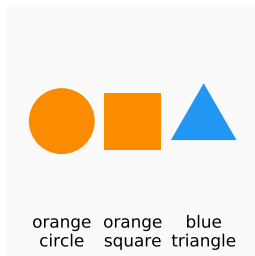

[ctx5] Grace & Leo

Scenario: Grace and Leo are hanging decorations for a party. Three cutouts sit on the table:

Utterances: Weak = "Can I get the purple one?"
Strong = "Can I get the circle?"

Question: How likely is it that Grace wants the purple circle?

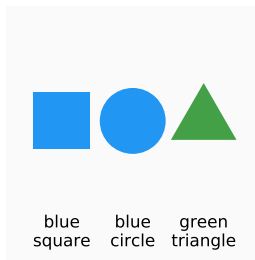

[ctx6] Ben & Ken

Scenario: Ben and Ken are sorting buttons for a sewing project. Three buttons sit on the table:

Utterances: Weak = "Give me the orange one, please."
Strong = "Give me the circle, please."

Question: How likely is it that Ben wants the orange circle?

Object stimuli (7–9 of 30)

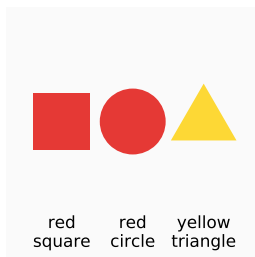

[ctx7] Nadia & Sara

Scenario: Nadia and Sara are organizing fridge magnets. Three magnets sit on the counter:

Utterances: Weak = “Can you hand me the blue one?”
Strong = “Can you hand me the square?”

Question: How likely is it that Nadia wants the blue square?

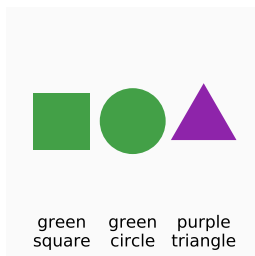

[ctx8] Colin & Dana

Scenario: Colin and Dana are picking out tile samples for a mosaic. Three tiles sit laid out in front of them:

Utterances: Weak = “Pass me the red one.”
Strong = “Pass me the square.”

Question: How likely is it that Colin wants the red square?

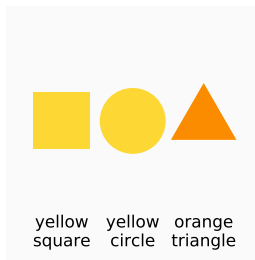

[ctx9] Wendy & Alex

Scenario: Wendy and Alex are cutting felt shapes for a classroom project. Three pieces sit in front of them:

Utterances: Weak = “Could you grab the green one?”
Strong = “Could you grab the square?”

Question: How likely is it that Wendy wants the green square?

Object stimuli (10–12 of 30)

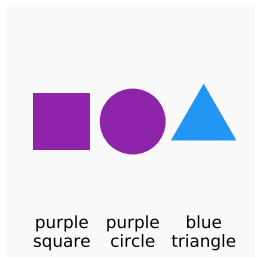

[ctx10] Hassan & Rima

Scenario: Hassan and Rima are laying out coasters for a dinner party. Three coasters sit on the table:

Utterances: Weak = “I’ll take the yellow one.”
Strong = “I’ll take the square.”

Question: How likely is it that Hassan wants the yellow square?

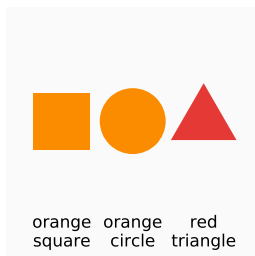

[ctx11] Julia & Peter

Scenario: Julia and Peter are sorting through a bin of old craft supplies. Three items sit in front of them:

Utterances: Weak = “Can I get the purple one?”
Strong = “Can I get the square?”

Question: How likely is it that Julia wants the purple square?

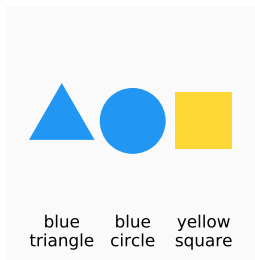

[ctx12] Marco & Elena

Scenario: Marco and Elena are unpacking a box of building blocks. Three blocks sit on the table:

Utterances: Weak = “Give me the orange one, please.”
Strong = “Give me the square, please.”

Question: How likely is it that Marco wants the orange square?

Object stimuli (13–15 of 30)

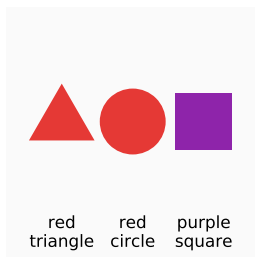

[ctx13] Aisha & Zane

Scenario: Aisha and Zane are setting up pieces for a board game. Three tokens sit on the table:

Utterances: Weak = “Can you hand me the blue one?”
Strong = “Can you hand me the triangle?”

Question: How likely is it that Aisha wants the blue triangle?

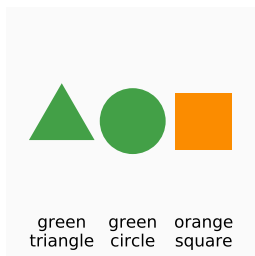

[ctx14] Derek & Maya

Scenario: Derek and Maya are arranging paint chips for a mural. Three chips sit on the table:

Utterances: Weak = “Pass me the red one.”
Strong = “Pass me the triangle.”

Question: How likely is it that Derek wants the red triangle?

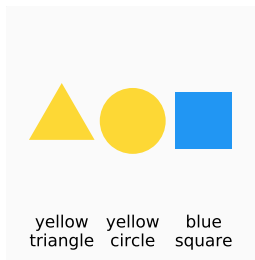

[ctx15] Fiona & Owen

Scenario: Fiona and Owen are hanging decorations for a party. Three cutouts sit on the table:

Utterances: Weak = “Could you grab the green one?”
Strong = “Could you grab the triangle?”

Question: How likely is it that Fiona wants the green triangle?

Object stimuli (16–18 of 30)

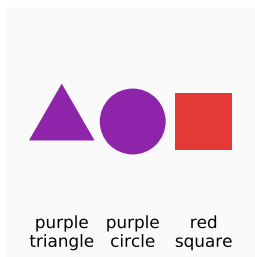

[ctx16] Kwame & Abena

Scenario: Kwame and Abena are sorting buttons for a sewing project. Three buttons sit on the table:

Utterances: Weak = “I’ll take the yellow one.”
Strong = “I’ll take the triangle.”

Question: How likely is it that Kwame wants the yellow triangle?

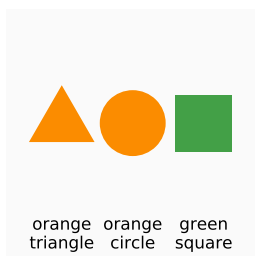

[ctx17] Nora & Felix

Scenario: Nora and Felix are organizing fridge magnets. Three magnets sit on the counter:

Utterances: Weak = “Can I get the purple one?”
Strong = “Can I get the triangle?”

Question: How likely is it that Nora wants the purple triangle?

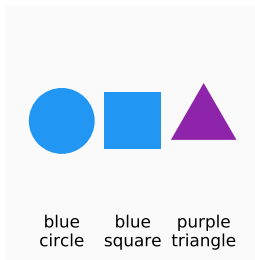

[ctx18] Vincent & Rosa

Scenario: Vincent and Rosa are picking out tile samples for a mosaic. Three tiles sit laid out in front of them:

Utterances: Weak = “Give me the orange one, please.”
Strong = “Give me the triangle, please.”

Question: How likely is it that Vincent wants the orange triangle?

Object stimuli (19–21 of 30)

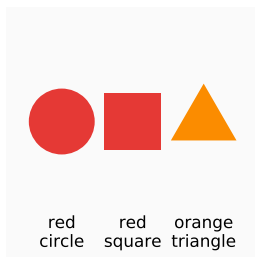

[ctx19] Lena & Milo

Scenario: Lena and Milo are cutting felt shapes for a classroom project. Three pieces sit in front of them:

Utterances: Weak = “Can you hand me the blue one?”
Strong = “Can you hand me the circle?”

Question: How likely is it that Lena wants the blue circle?

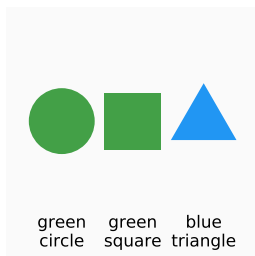

[ctx20] Tobias & Petra

Scenario: Tobias and Petra are laying out coasters for a dinner party. Three coasters sit on the table:

Utterances: Weak = “Pass me the red one.”
Strong = “Pass me the circle.”

Question: How likely is it that Tobias wants the red circle?

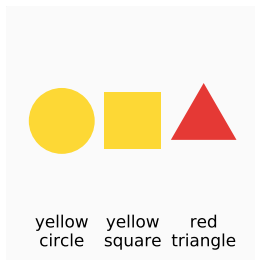

[ctx21] Ruby & Amir

Scenario: Ruby and Amir are sorting through a bin of old craft supplies. Three items sit in front of them:

Utterances: Weak = “Could you grab the green one?”
Strong = “Could you grab the circle?”

Question: How likely is it that Ruby wants the green circle?

Object stimuli (22–24 of 30)

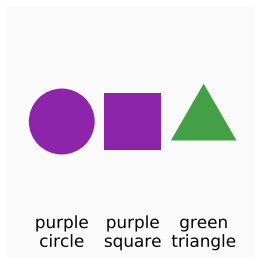

[ctx22] Anders & Sofia

Scenario: Anders and Sofia are unpacking a box of building blocks. Three blocks sit on the table:

Utterances: Weak = "I'll take the yellow one."
Strong = "I'll take the circle."

Question: How likely is it that Anders wants the yellow circle?

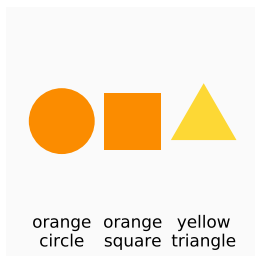

[ctx23] Camille & Louis

Scenario: Camille and Louis are setting up pieces for a board game. Three tokens sit on the table:

Utterances: Weak = "Can I get the purple one?"
Strong = "Can I get the circle?"

Question: How likely is it that Camille wants the purple circle?

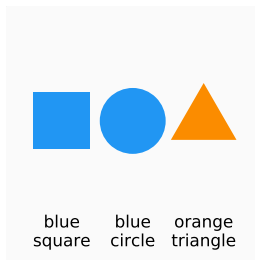

[ctx24] Diego & Ada

Scenario: Diego and Ada are arranging paint chips for a mural. Three chips sit on the table:

Utterances: Weak = "Give me the orange one, please."
Strong = "Give me the circle, please."

Question: How likely is it that Diego wants the orange circle?

Object stimuli (25–27 of 30)

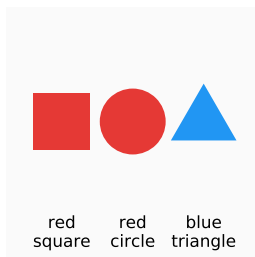

[ctx25] Elin & Karim

Scenario: Elin and Karim are hanging decorations for a party. Three cutouts sit on the table:

Utterances: Weak = “Can you hand me the blue one?”
Strong = “Can you hand me the square?”

Question: How likely is it that Elin wants the blue square?

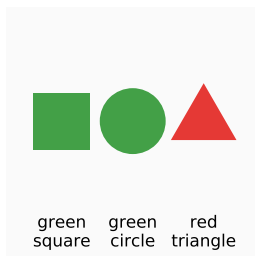

[ctx26] Franco & Petra

Scenario: Franco and Petra are sorting buttons for a sewing project. Three buttons sit on the table:

Utterances: Weak = “Pass me the red one.”
Strong = “Pass me the square.”

Question: How likely is it that Franco wants the red square?

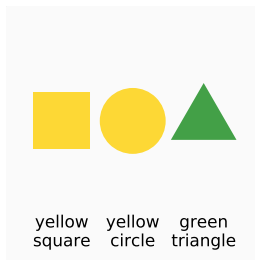

[ctx27] Greta & Otto

Scenario: Greta and Otto are organizing fridge magnets. Three magnets sit on the counter:

Utterances: Weak = “Could you grab the green one?”
Strong = “Could you grab the square?”

Question: How likely is it that Greta wants the green square?

Object stimuli (28–30 of 30)

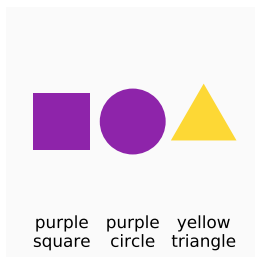

[ctx28] Hugo & Yuki

Scenario: Hugo and Yuki are picking out tile samples for a mosaic. Three tiles sit laid out in front of them:

Utterances: Weak = "I'll take the yellow one."
Strong = "I'll take the square."

Question: How likely is it that Hugo wants the yellow square?

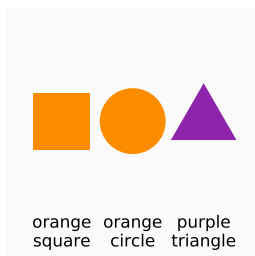

[ctx29] Ines & Sami

Scenario: Ines and Sami are cutting felt shapes for a classroom project. Three pieces sit in front of them:

Utterances: Weak = "Can I get the purple one?"
Strong = "Can I get the square?"

Question: How likely is it that Ines wants the purple square?

[ctx30] Jonas & Elias

Scenario: Jonas and Elias are laying out coasters for a dinner party. Three coasters sit on the table:

Utterances: Weak = "Give me the orange one, please."
Strong = "Give me the square, please."

Question: How likely is it that Jonas wants the orange square?
